Exp.No:10

VISUALIZE DATA USING ANY PLOTTING FRAMEWORK AIM:

To write an R code to visualize data using plotting framework such as scatter plot, bar char, histogram and box plot.

PROCEDURE:

- 1. Install and Load ggplot2: Ensure the ggplot2 package is installed and loaded to use its plotting functions.
- 2. Scatter Plot: Create a scatter plot of Sepal Length vs. Sepal Width, colored by Species, to visualize the relationship between these two variables across different species in the iris dataset.
- 3. Bar Chart: Generate a bar chart to show the count of different Species in the iris dataset, using bars filled with a specified color to represent the counts.
- 4. Histogram: Create a histogram of Sepal Length to visualize the frequency distribution of this variable within the dataset, specifying the bin width and colors for the histogram bars.
- 5. Box Plot: Plot a box plot of Sepal Length for each Species to compare the distribution and central tendency of Sepal Length across the different species in the dataset.

1) **SCATTER PLOT**

```
# Install ggplot2 (if not already installed)install.packages("ggplot2")

# Load the ggplot2 packagelibrary(ggplot2)

# Scatter plot of Sepal.Length vs Sepal.Width, colored by Species ggplot(data = iris, aes(x = Sepal.Length, y = Sepal.Width, color = Species)) +geom_point(size = 3) +

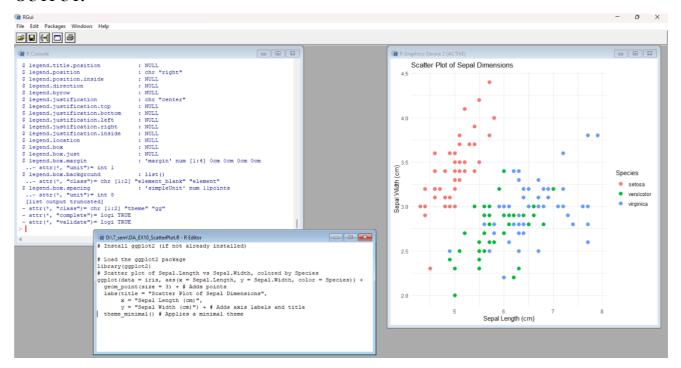

# Adds points

labs(title = "Scatter Plot of Sepal Dimensions",x = "Sepal Length (cm)",
    y = "Sepal Width (cm)") + # Adds axis labels and titletheme_minimal()

# Applies a minimal theme
```

Roll no:210701259

OUTPUT:

2) BAR CHART

- # Install ggplot2 (if not already installed)install.packages("ggplot2")
- # Load the ggplot2 packagelibrary(ggplot2)
- # Bar plot of Species counts ggplot(data = iris, aes(x = Species)) + geom_bar(fill = "steelblue") +
- # Adds bars filled with steel blue color

labs(title = "Count of Different Species in Iris Dataset",x = "Species",y = "Count") + theme_minimal()

Reg.No: 210701259

OUTPUT:

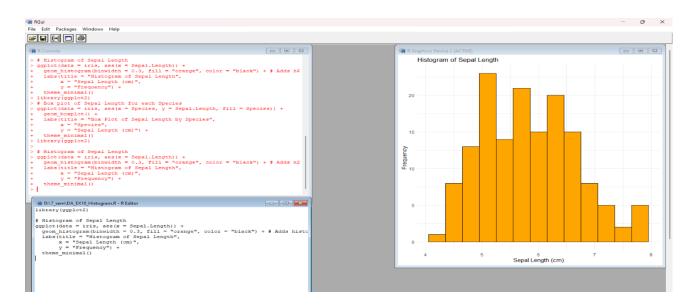

3) HISTOGRAM

- # Install ggplot2 (if not already installed)install.packages("ggplot2")
- # Load the ggplot2 packagelibrary(ggplot2)
- # Histogram of Sepal Length

ggplot(data = iris, aes(x = Sepal.Length)) + geom_histogram(binwidth = 0.3, fill = "orange", color = "black") + labs(title = "Histogram of Sepal Length",x = "Sepal Length (cm)", y = "Frequency") +theme_minimal()

OUTPUT:

Reg.No: 210701259

4)BOX PLOT

- # Install ggplot2 (if not already installed)install.packages("ggplot2")
- # Load the ggplot2 packagelibrary(ggplot2)
- # Box plot of Sepal Length for each Species
 ggplot(data = iris, aes(x = Species, y = Sepal.Length, fill = Species)) +geom_boxplot() +
 labs(title = "Box Plot of Sepal Length by Species",x = "Species",y = "Sepal Length (cm)") +
 theme_minimal()

OUTPUT:

Reg.No: 210701259

RESULT:

Thus the R program to visualize data using plotting framework such as scatter plot, bar char, histogram and box plot has been executed and verified successfully.
